Track Two: Data-driven Forest Protection

The Challenge

High Mortality & Poor Accountability

The Problem

High mortality of planted trees and poor accountability undermine forest restoration efforts.

Our Mission

- **Forest Protection:** Prevent tree loss through monitoring
- **Data Collection:** Track tree survival systematically
- **Community Engagement:** Build ownership and accountability

Introducing MsituGuard

A Comprehensive Tree Survival Platform

Tree Survival Prediction Model — ML-powered predictions for proactive intervention

Tree Registration + Badges System — Gamified accountability and recognition

Environmental Reporting — Rapid response to incidents and threats

Community Forum — Knowledge sharing and collective action

Why It's Innovative: We focus on ensuring tree survival through technology and community, not just planting.

Key User Journeys

From Planting to Thriving

Tree Survival Prediction

Predict survival chance s of trees

Tree Registration & Monitoring

Register trees and track progress over time with regular photo check-ins.

Gamified Accountability

Earn badges for consistent care and get recognized in the community.

Environmental Reporting

Report incidents and threats for rapid community response.

Community Forum

Share best practices and organize local care events together.

Expected Impact

From Seedling to Sustainable Forest

Environmental Impact

- ✓ **Increased Tree Survival:** Predictive alerts reduce post-planting mortality
- ✓ **Enhanced Forest Protection:** Rapid incident reporting minimizes damage

Community Impact

- ✓ **Fostered Ownership:** Badges and forums build collective responsibility
- ✓ **Recognition & Motivation:** Badge-holders recognized at environmental summits

Our Vision & Path Forward

Empower every citizen to be a steward of the environment through technology and community action.

Phase 1: Pilot Program

Deploy in a priority county, refine the model, and gather real-world data

Phase 2: Community Education

Train MsituGuard Trainers to onboard and support local communities

Phase 3: National Expansion

Scale across all counties nationwide

Why This Works

Our scalable technology platform combined with community-driven implementation ensures local relevance and lasting impact at every level.

Thank You

Join us in making **MsituGuard** a reality. Together, we can restore our beautiful environment.
